VIVECK WAGGH

Senior QA Automation Engineer

+918856075623 • viveckwaggh@gmail.com • Pune, India

Summary

Senior QA Automation Engineer with 10+ years of experience in Software Quality Engineering, test automation, and QA across web, mobile, and backend systems. Proficient in Playwright, Selenium WebDriver, TypeScript, JavaScript, REST API testing, and CI/CD pipeline integration. Experienced in automation framework development, regression testing, defect investigation, root-cause analysis, release management, and Agile collaboration. Leverage GitHub Copilot, ChatGPT, and Claude for AI-assisted test automation, while leading QA teams and improving test coverage, release quality, and engineering efficiency.

Skills

Programming & Web: TypeScript, JavaScript, Python, Java, Ruby, SQL, HTML, CSS, Browser DevTools

Automation: Playwright, Selenium WebDriver, Appium, Cucumber BDD, Page Object Model

CI/CD & Engineering Tools: Jenkins, GitHub, GitLab CI/CD, Docker, Git, Build and deployment workflows

API & Backend Testing: REST API Testing, Postman, Karate, JSON, Microservices, SQL, GraphQL, Database testing, Backend Integration

AI Assisted Testing: ChatGPT, Claude, GitHub Copilot

Mobile Quality: iOS, Android, TestFlight, Firebase App Distribution, Firebase Crashlytics, Android Studio, Mobile traffic analysis

Performance and Security: JMeter, Security scanning with OWASP ZAP, Accessibility testing, Localization testing

Test Management & Observability: Jira, Qase, TestRail, TestMo, Grafana, CloudWatch, Sentry, Elasticsearch, Kibana

Experience

Sportserve

Remote

Senior QA Automation Engineer

04/2023 - Present

- Own end-to-end QA strategy and release quality for high-volume web and mobile products, covering functional, regression, exploratory, and API testing.
- Built and maintained Playwright automation for critical user journeys, achieving approximately 80% regression automation coverage, and integrated tests into CI/CD pipelines.
- Drive release readiness and go/no-go decisions through risk assessment, defect analysis, and collaboration with engineering and product teams.
- Investigate complex defects across ReactJS/NodeJS applications using logs, monitoring, API responses, and test results to identify root causes.
- Lead and mentor four QA engineers, promoting consistent testing practices and automation standards across Agile teams.
- Developed an AI-assisted, Jira-integrated Release Regression Hub with AI-agent support, replacing manual Excel tracking and reducing release tracker preparation from 30 to 40 minutes to approximately 5 minutes.
- Use GitHub Copilot, ChatGPT, and Claude to accelerate test automation development and maintenance.

Monese

Tallinn, Estonia

QA Engineer

10/2022 - 04/2023

- Owned end-to-end QA for iOS and Android digital banking applications, testing banking transactions, customer journeys, API integrations, and release quality.
- Collaborated with Product Owners and developers in Agile teams to validate banking requirements, acceptance criteria, and release risks.
- Used Postman and Charles Proxy to investigate API, network, and backend integration issues, supporting root-cause analysis.
- Managed beta testing through TestFlight and Firebase App Distribution, contributing to multiple mobile banking releases with zero critical production defects during tenure.

Encubate Tech Pvt. Ltd

Remote

Senior QA Analyst

06/2021 - 06/2022

- Established QA processes, UAT strategy, acceptance criteria, and defect management for ReactJS and Rails apps.
- Executed functional, regression, integration, end-to-end, API, microservices, usability, and cross-platform testing.
- Collaborated with Product, Development, and integration teams to assess risks, validate business workflows, manage Jira defects, and improve test coverage, QA practices, and release readiness.

Experience

Talentica Software
Pune, India

Senior QA Engineer
09/2018 - 05/2021

- Developed a Selenium WebDriver and Cucumber BDD automation framework using the Page Object Model; maintained regression suites and test scripts in collaboration with development teams.
- Executed functional, regression, Karate API, database, usability, and cross-platform testing for web and mobile applications.
- Mentored junior QA engineers, collaborated with international clients, and performed JMeter performance testing and OWASP ZAP security scans.

Wipro Technologies
Pune, India

QA Engineer
07/2015 - 10/2018

- Collaborated with cross-functional Agile teams to plan and execute manual and automated testing for enterprise web applications, covering functional, API, and cross-browser scenarios across multiple environments.
- Worked closely with developers to investigate and resolve defects, validate positive, negative, and edge cases, and provide clear defect reports and test evidence to support sprint delivery and product quality.

Education

Walchand College of Engineering
Sangli, India

B.Tech. In Information Technology
08/2012 - 08/2015

Certifications

Executive Certification - Product Management In Digital Era
